

SECOND REPORT · 30 OCTOBER 2026

Seeded Catalog Production Check

A continuation of the Africa Autopart coverage report, comparing live production catalog data with the supplied vehicle workbooks and VIN test list.

2	7	38,757	4 / 35
LIVE MAKES	LIVE MODELS / SERIES	MODEL-LEVEL PART ROWS	ARCHIVE VINS MATCHED EXACTLY

What changed since Report 01: live production now returns catalog data for seven Hyundai and Toyota model series. The previously listed Haval Chitu series is not present in the current live make/model catalog.

Sources: live site, production API, prior report, and supplied RAR. Production and archive counts are kept separate.

CURRENT CATALOG FOOTPRINT

What production contains

The live make endpoint returns **HYUNDAI** and **TOYOTA**. Their model endpoints return two Hyundai models and five Toyota models. Exact make/model parts queries return the totals below; their sum agrees with the live search total of 38,757.

Make	Model	Live part rows	Catalog series
Toyota	Fortuner	8,978	Fortuner (2016–2020)
Toyota	Hilux	3,271	Hilux (2011–2015)
Toyota	Land Cruiser	3,744	Land Cruiser 70 (2007–)
Toyota	Land Cruiser Prado	13,155	Land Cruiser Prado 150 (2017–2020)
Toyota	Vios	2,309	Yaris / Vios / Limo (2016–2017)
Hyundai	Creta	4,549	Creta 18 (2018–2021)
Hyundai	Santa Fe	2,751	Santa Fe 18 (2018–2020)

Totals: Toyota 31,457 rows · Hyundai 7,300 rows · Combined 38,757 rows. A 48-row page request returns 48 records, matching the frontend catalog page size.

Not available in current production make/model data: Haval and Chitu. The live API returns zero Chitu parts. Report 01’s Haval Chitu line should be marked unavailable pending backend confirmation or new seed data.

Counts are the API’s model-level `totalCount` values from the make/model parts route, checked on 30 October 2026. They are not counts of unique part numbers.

TOYOTA COVERAGE

Fortuner and Hilux

01 · FORTUNER

Series	GUN155L-SDTSHV · Fortuner (2016–2020)
Live part rows	**8,978**
Verified VINs	`MHFKB8FS8L0087472` · `MHFKB8FS3L0087475`
Sample body style	Wagon · 5 doors · 7 passengers
Sample group	Tool/Engine/Fuel Group · Standard Tool
Image URL sample	0 of first 20 results returned an image URL

Both Fortuner VINs matched the live VIN search. Each VIN query returned 4,489 rows; together that equals the model-level total.

02 · HILUX

Series	LAN25L-PRMDEN · Hilux (2011–2015)
Live part rows	**3,271**
Verified VIN	`AHTFK22G003081805`
Sample body style	Double cab pickup · 4 doors · 5 passengers
Sample group	Tool/Engine/Fuel Group · Standard Tool
Image URL sample	3 of first 20 results returned an image URL

The workbook has 3,786 part rows for this VIN. Production returns 3,271 rows for the model/VIN query.

TOYOTA COVERAGE

Land Cruiser and Prado

03 · LAND CRUISER 70

Series	HZJ76L-RKMRS · Land Cruiser 70 (2007–)
Live part rows	**3,744**
Verified VIN	`JTEEB71J31F007215`
Sample body / group	Wagon · 5 doors · Body Group
Image URL sample	3 of first 20 results returned an image URL

04 · LAND CRUISER PRADO 150

Series	KDJ150L-GKAEY · Prado 150 (2017–2020)
Live part rows	**13,155**
Verified VINs	`JTEBH3FJ20K223806` · `JTEBH3FJ205104748`
Sample body / group	Wagon · 5 doors · 7 passengers · Tool/Engine/Fuel Group
Image URL sample	0 of first 20 results returned an image URL

The live series route separates Prado from Land Cruiser 70. The old report’s Prado VIN still returns a matching Prado row.

TOYOTA COVERAGE

Yaris / Vios / Limo

05 · VIOS

Series	NSP15# · Yaris / Vios / Limo (2016–2017)
Live part rows	**2,309**
Verified VIN	`MHFB29F34H2016909`
Sample body / groups	Sedan · 4 doors · Body, Electrical, and Power Chain/Chassis Groups observed
Image URL sample	0 of first 20 results returned an image URL

> The exact VIN from Report 01 remains a valid live catalog example. The API returned the sedan body style and records in Body, Electrical, and Power Chain/Chassis groups in the first page sample.

Live exact model total: 2,309 part rows. First-page image sample: 0 of 20 records returned an image URL.

HYUNDAI COVERAGE

Creta and Santa Fe

06 · CRETA 18

Series	IGENPA018 · Creta 18 (2018–2021)
Live part rows	**4,549**
Verified VIN	`MALC281CBLM594521`
Sample vehicle	2020 · Wagon · 5 doors · 5 passengers
Sample group / engine	Engine · 1.6L · Gamma · DOHC MPI
Image URL sample	20 of first 20 results returned an image URL

> Report 01’s example VIN `MALC281CBLM567587` returned no exact catalog rows. Use the verified VIN above for the updated series example.

07 · SANTA FE 18

Series	KMESPS118 · Santa Fe 18 (2018–2020)
Live part rows	**2,751**
Verified VIN	`KMHS281D9LU290945`
Sample vehicle	2020 · Wagon · 5 doors · 7 passengers
Sample group / engine	Engine · 2.4L · Theta 2 · DOHC GDI
Image URL sample	20 of first 20 results returned an image URL

> The image figures are a sample of the first 20 records returned for each model. They are a check of URLs delivered to the frontend, not a full-image audit of every catalog row.

WHAT THE SUPPLIED ARCHIVE CONTAINS

VIN workbooks, parts and groups

The RAR contains five XLSX workbooks: four VIN-specific parts workbooks and one 35-VIN test list. The four parts workbooks include vehicle metadata, part rows and picture IDs.

Workbook VIN / model	Part rows in workbook	PNG files in folder	Production model total
AHTFK22G003081805 · Hilux	3,786	216	3,271
JTEBH3FJ20K223806 · Prado	6,071	290	13,155
MHFKB8FS3L0087475 · Fortuner	5,732	264	8,978
MHFKB8FS8L0087472 · Fortuner	5,732	264	8,978
Total source bundle	**21,321**	**1,034**	Not additive across VINs

Every part row in these four workbooks had a Pic_ID. The archive's duplicate Fortuner vehicle configuration appears under two distinct VINs. Workbook rows and live model counts are not directly equivalent measures; they differ by source, VIN scope, and catalog aggregation.

Part group distribution in the four workbooks

Group	Rows	Share of workbook rows
Body Group	7,020	32.9%
Power Chain/Chassis Group	6,783	31.8%
Electrical Group	3,880	18.2%
Tool/Engine/Fuel Group	3,638	17.1%

> These are exact group totals calculated from the supplied workbooks. Live result samples show these same group families and also use the label **Engine** for Hyundai rows.

PRODUCTION VALIDATION

Exact VIN matches

4 EXACT CATALOG MATCHES

31 NO EXACT CATALOG ROWS

35 VINS CHECKED

VIN	Production match	Model / series	Archive status
`JTEBH3FJ20K223806`	Matched	Land Cruiser Prado 150	Data-ready workbook
`MHFKB8FS8L0087472`	Matched	Fortuner	Data-ready workbook
`MHFKB8FS3L0087475`	Matched	Fortuner	Data-ready workbook
`AHTFK22G003081805`	Matched	Hilux	Data-ready workbook

The remaining 31 VIN test cases returned zero exact catalog rows. This includes invalid-format examples, vehicles noted in the workbook as unsupported/no-data, and the HOWO VIN marked for later data. Two initial requests timed out; retries returned HTTP 200 with zero rows.

Old report examples to update

Report 01 example	Live exact result	Suggested action
Haval Chitu · `LGWEEUA50SL614287`	No Haval make or Chitu model	Mark unavailable until reseeded
Creta · `MALC281CBLM567587`	No exact row	Replace with `MALC281CBLM594521`
Santa Fe · `KMHS281D9LU290945`	Matched	Keep
Land Cruiser 70 · `JTEEB71J10F013008`	No exact row	Replace with `JTEEB71J31F007215`
Prado · `JTEBH3FJ205104748`	Matched	Keep; archive VIN also matches
Vios · `MHFB29F34H2016909`	Matched	Keep

WHAT THE USER SEES

Search flow and verification limits

Current frontend search flow

1. Home search calls the vehicle VIN endpoint for decode/metadata.
2. It then calls the unified vehicle search with the VIN, keyword, or part number.
3. Results display model, series, part number/name, group/subgroup, body and engine details, and image URL when returned.
4. The results page requests 48 items per page; production returns that page size.

API and display gaps observed

- `/api/parts/groups` is called by the frontend but returns 404. The page falls back to hardcoded Chinese categories and adds group names found in the currently loaded results.
- `/api/vehicles/vin/{vin}/decode` is the frontend fallback URL but is absent from the live API routes. A separate VIN search route exists.
- Direct VIN lookup metadata can report no catalog match even when unified VIN search returns exact part rows. Use the unified search result as the basis for exact VIN evidence in this report.
- Image URLs are not present on every sampled production result, despite Pic_ID values and image files in the archive.
- The separate `/api/PartsSeed` catalog used by the shop returned empty models and zero items. The vehicle catalog search is populated.

> **Scope:** these checks used public GET/POST lookup requests only. No registration, contact submission, image upload, inventory/order mutation, or payment action was performed. No backend write routes were tested.

Suggested Report 03 update process

- Refresh make/model/series totals from production.
- Verify each featured VIN with an exact VIN-filtered search and record a returned row.
- Capture the first representative part image and check the image URL loads.
- Use workbook counts only when explicitly labelled as supplied-source rows; keep them distinct from live totals.
- Ask the backend for a complete distinct body-class/group/category endpoint before publishing exhaustive taxonomy claims.

Checked: live site at autopartafrica.com; Workers API Swagger and catalog routes; supplied previous PDF; supplied RAR workbook sheets and images. Verification date: 30 October 2026.
