Year labels: “Catalog range” is the backend compatibility metadata; “MY” is the model year present in the catalog rows. A range does not prove that every intervening year has matching parts.

Availability means searchable catalog records, not confirmed stock or complete component coverage. Rows may repeat part numbers across fitments/VINs. No RHD, Nissan Note or Haval Chitu rows were returned in this snapshot.

Verification: all 194 catalog pages reconciled to 38,757 unique record IDs; all 11 VINs returned matching frontend part cards. Published production data was checked; import-batch completeness cannot be certified without a seed manifest.

Source: live vehicle catalog API (africaautopart-api.frankotieno254.workers.dev), checked 9 Nov 2026 at 20:45 UTC / 23:45 EAT; prior docs supplied the comparison cases.
